

## **Covius™ Streamlines Bidding and Adds VIP Program to Its RealtyBid Auction Platform**

**Denver—June 3, 2021**—Covius Holdings, Inc., a leading provider of technology-enabled solutions to the financial services industry, announced today that it has added additional enhancements to its RealtyBid online auction platform, including bidder and investor benefits and incentives.

RealtyBid® is a national online and live auction platform with a 20-year record of helping sellers achieve expedited sales goals and buyers maximize investments.

The new enhancements include:

- An all-new VIP Investor Program that rewards loyal buyers with automatic perks such as concierge services, dedicated asset managers and customized inventory lists
- Multiple bidder purchase profiles, which are built to maintain buyer information and auto-populate purchase contracts for several buying entities for each bidder, decreasing manual input and increasing efficiency and closing turn time
- An advanced document library that enables users to upload, store and present documents quickly when bidding and buying

These enhancements complement the recently announced integration of Weiss Analytics' ([www.weissanalytics.com](http://www.weissanalytics.com)) home price data and property and market forecasts that are now available on the RealtyBid platform. The new analytics allow buyers to use sophisticated analyses to determine price trajectory of individual properties, neighborhoods and to investigate market dynamics on 80 million properties.

“The new user-friendly enhancements to RealtyBid provide bidders and investors a more streamlined buying process that will increase their efficiency and ultimately their success,” said Chris Link, SVP, RealtyBid. “Our new in-house enhancements, coupled with Weiss’ data and analytics, create an unparalleled buying experience.”

The new capabilities are part of Covius Connected, a broad and flexible strategic blueprint for enhancing our clients’ digital experience by increasing transparency, consistency, performance and ease of integration. All Covius Connected services are intended to be self-serviceable, flexible, scalable, fault tolerant and secure. Covius Connected simplifies the buying and onboarding processes and shrinks time to value and ROI for clients.
